

# STUDIO TOOLBOX

Firmware: Studio v. 4.01 • Part: ATB-S2 • MSRP: \$899.00

The Studio Toolbox is designed to help engineers through all steps in the recording process. With applications for pre-production along with recording and post-production, The Studio Toolbox is designed to help studio owners mix better, master better, and maintain studio equipment better.

TerraSonde's Studio Toolbox provides a comprehensive set of powerful, accurate, audio tools in an affordable, easy-to-use package. It uses DSP technology and high-quality analog audio stages, has a graphical backlit 64x128 LCD display, an encoder input control, microphone and built in speaker. The Studio Toolbox also features a fully balanced XLR and 1/4' input and output, unbalanced RCA and MIDI in and out. All graphical functions may be assigned to 40 non-volatile memories and then may be transferred to a PC or Mac for printing. The Studio Toolbox is AC or li-ion battery powered.
